

BLASTPRO MFG

BRB-4500 – The Big Red Beast is the largest and most productive ride-on floor scraper and is designed to remove the toughest floor coverings including elastomeric traffic coatings, tile, carpet, tile mortar, vinyl, hardwood flooring, adhesives, thin set adhesives, rubber, PVC sheet roofing, sports flooring, quarry tile and pool deck coatings.

BP-20-40 – The BP 20-40 is the most advanced steel cleaning system on the market and is ideal for cleaning floors and roofs of petrochemical storage tanks, water storage tanks, and ship decks. The BP-20-40 features modular construction that allows the machine to be dismantled to fit through a 24” manhole and is the only breakdown machine which combines a 20” blast pattern, a 40 hp electric motor, and an on-board dust collector.

BPS-225 – The Shell Machine is designed for blasting and cleaning the vertical and near vertical steel surfaces of petrochemical storage tanks, water storage tanks, and ship hulls. The machine features a 38” blast pattern, two 25 hp electric motors, and is controlled remotely by the operator. The Shell Machine is the most productive vertical shotblasting machine on the market and is ideally suited for surface preparation contractors and steel painting contractors.

BPZ-16-360 – The BPZ-16-360 ride-on shotblasting machine is the perfect choice for surface preparation on large jobs including parking garages, bridge decks, highways, airport runways, and warehouse and industrial plant floors. The BPZ-16-360 features an industry revolutionizing zero turn radius, joy stick steering, on-board pulse style dust collector, non-marking tires, hydraulic front end lift, and a hydraulic shot valve.

BP-10 Super – The BP-10 is designed for medium to large jobs including industrial plant and warehouse floors, parking garages, bridge decks, ship decks, storage tanks and other horizontal applications. The BP-10 is an electric walk behind machine with a 10” blast pattern, high quality electrical components, an advanced air wash separation system, and operates on 208, 230, or 460 volt three phase power.

BP-15 Super – The BP-15 is designed for medium to large jobs including industrial plant and warehouse floors, parking garages, bridge decks, ship decks, storage tanks and other horizontal applications. The BP-15 has a 15” blast pattern, high quality electrical components, an advanced air wash separation system, and operates on 208, 230, or 460 volt three phase power.

BP-9-4SP – The BP-9-4SP is an affordable self-propelled 220 volt single phase blast cleaning system designed for small to medium size jobs as well as being a complimentary unit on larger jobs for doing edges and hard to reach areas. The BP-9-4SP is used to prepare concrete surfaces prior to the application of paint, coatings, or overlays on garage floors, balconies, basements, pool decks, and edges.

BP-9-220 – The BP-9-220 is an affordable 220 volt single phase blast cleaning system designed for small to medium size jobs as well as being a complimentary unit on larger jobs for doing edges and hard to reach areas. The BP-9-220 has a 9” blast pattern, is portable, lightweight, easy to use, and is ideal for garage floors, balconies, basements, pool decks, and edges.

BP-9-110 – The BP-9-110 is an affordable 110 volt single phase blast cleaning system designed for small to medium size jobs as well as being a complimentary unit on larger jobs for doing edges and hard to reach areas. The BP-9-110 has a 9” blast pattern, is portable, lightweight, easy to use, and is ideal for garage floors, balconies, basements, pool decks, and edges.

BP-9-54 – The BP-9-54 is BlastPro’s state of the art dust collection system and is recommended for use with the BP-10, BP-15, and BP-20-40. The 1200 cfm dust collector has nine filters which are pulse cleaned every thirteen seconds and the large dust bin enables the contractor to blast for extended periods of time. The BP-9-54 also features 2 additional 2” vacuum inlets which allow additional equipment such as grinders or edgers to be operated simultaneously.
