

SHORTSTOP®

CS-125 SILO

The CS-125 Silo

is a portable, self-contained silo designed to store up to 11,000 pounds of dry bulk cement or mortar to be used on job sites or in-plant applications. Exclusive time-based metering controls allow the operator precise recipes for batching into a mixer or a process. A remote control with touch key pad and LED readout can be moved to the mixer or process. The silo is filled by suspending a super sac over the top hatch with a fork lift or crane.
